## **EXAMINER'S REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or suggest a multilayer polyester film comprising a base layer containing a blend of poly(m-xyleneadipamide) and polyester, and a barrier layer containing a blend of a maleic acid/acrylic acid copolymer and an additional film-forming material, wherein: (1) the base layer has a specified gloss value (prior to application of the barrier layer) and the film has the specified oxygen barrier property (claim 1); or (2) the film only contains polymerization catalyst residues (in contrast to oxidation or oxygen-scavenging catalyst compounds) (claim 21). Specifically, COCHRAN ET AL '515 and SHARE ET AL (US 2003/0039779) fail to specifically disclose or suggest the use of an additional barrier coating comprising the recited copolymer; the POSEY ET AL references (US '735 and US 2003/0124365 and WO 03/041955) fail to suggest combining an additional maleic acid/acrylic acid-based blend barrier coating with a poly(m-xyleneadipamide) and polyester blend film.

The obviousness double patenting rejections in the previous Office Action have been overcome by the Terminal Disclaimer filed 3/16/2005.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
